Massey Ferguson Excellence

Anyone who buys an MF Telehandler today will expect it to fulfil the latest operational and environmental standards. They will expect it to combine the very best of today's technologies with comfort, simplicity, reliability and quality day in day out on the farm. Our engineers have farming in their blood and visionary powers. They are eager to develop new solutions to the complex challenges of today's and tomorrow's farming.

Reliability is in our DNA. We are committed to delivering the highest quality at all times. Each component of the new MF TH Series has been carefully designed, selected and assigned to the best manufacturing supplier and has been assembled following the latest manufacturing technologies.

The new generation of agricultural telehandlers

We are a Global Brand. We are Massey Ferguson. We are committed to farming from more than 170 years, and the new MH TH Series is the telehandler that embodies the full meaning of this statement.

This is a telehandler that embodies all our farming know-how. Because we understand your farm handling needs, we are offering you a true Agricultural Telehandler, supported by a true Agricultural dealer network to enable you to carry on with the most demanding handling operations such as moving bales, feeding animals or cleaning barns.

Everywhere you look, everything you touch, there is this feeling of high quality. In the bonnet and in the steering wheel you see the logo of a brand that you trust on. You are about to begin some hard work operating the new MF TH Series for the first time. You don't know how it will be, but you have the feeling that this new telescopic handler won't let you down and will offer you really high level of performance in all operations.

A vital part of your working day

Our New telehandlers are purpose-built for hard work. Wherever you need a quick, compact solution to many applications, the MF TH Series has the capacity to perform.

- Grab silage and muck, lift bales and fertiliser bags, shift feed and clean sheds
- There are plenty of implements to choose from to accompany your MF telehandler, including a bale spike, bale squeeze handler, pallet fork and bucket
- Powerful, precise hydraulics allow easy operation of heavy lifting
- Working in tight buildings can often be a challenge. MF TH Series telehandlers are highly manoeuvrable with three steering modes and the option of the MF TH.6030 semi-compact machine. Get the flexibility you need – including all-round visibility and precision handling
- Minimal servicing required which means hardly any downtime!

MF TH SERIES TELEHANDLERS

Choose your maximum capacity depending on your individual needs!

MF TH SERIES

Handling jobs effortlessly and efficiently, the New MF TH Series provides any farmer with the optimum accessibility and manoeuvrability required. This new range also gives more lift height, a longer reach and the ability to lift heavier payloads compared to the successful MF 9000 Series. With the right attachment, the MF TH Series can achieve paramount performance in a wide variety of applications around the farm.

MF TH.6030

2,1 x 2,1 m semi compact dimensions
to easily access the most confined area
100hp for optimum power to weight ratio
100 l/min for easy and accurate work

3.4t

6.5m

MF TH.6534

More engine power and oil flow for the most demanding handling and transport applications 130hp and 190 l/min oil flow for reduced full work cycle

3.5t

7.0m

MF TH.7035

The right balance for the most demanding handling applications

3.8t

7.0m

MF TH.7038

More engine power and oil flow for the most demanding handling and transport applications 130hp and 190 l/min oil flow for reduced full work cycle

Raising the bar

Massey Ferguson's Tier 4 Final TH Series models are now upgraded with a number of new features to further improve productivity, ease of use and efficiency.

Excelling in both loader operations where plenty of hydraulic flow is provided through to 40 km/h road transport applications, where power and comfort is essential, each telehandler boasts impressive capabilities, whether you are moving bales or shifting feed. This new range also offers essential and unbeatable visibility thanks to the new cab and the new engine basket design that allows the operator to work unhindered and in complete safety.

HIGHLIGHTS

- 01 A full selection of attachments available**
to do all the jobs required – see details p.24
- 02 Quick hydraulic couplers**
for fast, efficient and easy change of equipment with New Electric line on Boom for 4th and 5th electric function (optional) – see details p.16-17
- 03 Smart and powerful hydraulics**
All models are fitted as standard with a load sensing valve block. Multiple functions can be done at the same time. Now up to 190l/min CCLS oil flow – see details p.16-17
- 04 Unbeatable lift capacity**
from the strength boom – up to 7.00m high and 3,800 kg (vs 3,500 kg on the previous MF 9000 range)
- 05 Efficient boom suspension and Cushion Retract**
Boom suspension is available as an option on all models for maximum comfort in transport conditions. Cushion Retract is available as standard on all models for more comfort to the operator allowing the boom to retract smoothly by a reduced/amortized speed
- 06 Unbeatable comfort and visibility**
The MF TH Series cab environment is equipped/fitted with the highest levels of comfort and controls, with maximum all-round visibility thanks to the curved shape of the cab on the MF TH.6534, MF TH.7035 and MF TH.7038 and the new lowest engine bonnet design – see details p.14-15
- 07 New powerful and fuel efficient engines**
Now up to 130hp for more productivity and performance Maintenance-Free and DPF- Free Engine design for less downtime and low cost of operation. Easy access for daily maintenance and an automatic fan inverter option for greater reliability & durability – see details p.18
- 08 Three semi-automatic selectable steering modes**
to provide optimum manoeuvrability in all operating conditions – see details p.12-13
- 09 Four-speed (2 mechanical x 2 hydraulic) hydrostatic transmission**
offers simplicity, smooth operation and best in class precision (MF TH.6030 is only fitted with a 2 speed transmission) – see details p.19
- 10 Automatic Parking Brake**
for increased safety and productivity

Models	Max. lift Height	Max. lift Capacity	Oil Flow	Max Power	Transmission
MF TH.6030	6.0 m	3,000 kg	100 L/min	100 hp	Hydrostatic
MF TH.6534	6.5 m	3,400 kg	190 L/min	130 hp	Hydrostatic
MF TH.7035	7.0 m	3,500 kg	100 L/min	100 hp	Hydrostatic
MF TH.7038	7.0 m	3,800 kg	190 L/min	130 hp	Hydrostatic

MF TH.6030 - Compact dimensions, outstanding manoeuvrability, unbeatable operator comfort

The range starts with the MF TH.6030 semi-compact telehandler. If you are looking for a more compact machine that can still tackle the toughest jobs then the MF TH.6030 is the ideal choice. Its semi-compact design, two cab positions and excellent manoeuvrability ensure unsurpassed performance in tight areas such as narrow barns and poultry buildings.

Don't be deceived by its size, the MF TH.6030 boasts massive lift capacity with the added benefit of being more condense than its bigger counterparts.

Impressive lift capacities in a semi-compact format. 6,00m height and up to 3 tons making it more than capable of handling many tasks around the farm.

For a smoother operation when retracting the boom, the MF TH.6030 is fitted with dampened retracting system.

Excellent manoeuvrability ensures hassle-free working days for maximum productivity. The spacious cab and comfortable operator area with fully proportional joystick allow for smooth operation.

Two cab positions for maximum versatility including low position for load operation in narrow building. Perfect for jobs where room is limited. The compact design means this model can get in and out of very tight areas without losing visibility and manoeuvrability.

Maximum productivity, agility and manoeuvrability

Every model in the new Massey Ferguson Telehandler line-up is impressive. With engine horsepower up to 130 hp, each one has the power and endurance to tackle the toughest jobs when you need it most. The MF TH Series is a serious performer that will prove to be invaluable around the farm. Speed, agility and strength are just some of the key benefits that make this the ideal multipurpose workmate in all kinds of farming operations.

Handling jobs effortlessly and efficiently, the MF TH Series provides you with the optimum accessibility and manoeuvrability that you require. This range also gives you more lift height, a longer reach and the ability to lift heavier payloads. With the right attachment, the MF TH Series can achieve outstanding performance in a wide variety of applications around the farm.

Excelling in both loader operations, where plenty of hydraulic flow is provided, through to 40 km/h* road transport applications, where power and comfort is essential, each MF telehandler boasts impressive capabilities, whether you're moving bales or shifting feed. This new range also offers essential and unbeatable visibility thanks to the new cab design that allows the operator to work unhindered and in complete safety.

*Dependent on market-specific legislation

Boom and chassis design

The new, slender chassis with a shorter overall length ensures stability and excellent manoeuvrability when you need it the most, as well as reassuring durability in the heaviest agricultural operations. A lower boom pivot allows unobstructed visibility around the entire machine, for safer, more productive operations.

Optional boom suspension is available, which greatly increases operator comfort, for example, when towing a large trailer of straw at 40 km/h* during road transportation.

Steering functions

All models have three selectable steering modes, two-wheel steer, four-wheel steer and crab-steer to provide optimum manoeuvrability in all operating conditions. Changing from one mode to another is very easy. Just pre-select the mode by pressing the switch in the cab and the mode will be engaged.

Two-wheel steering mode

Four-wheel steering mode
- for minimum turning circles.

Crab-steer mode
- for efficient filling and grading and working alongside walls and in confined spaces.

Operator environment – productive, efficient, comfort

The Massey Ferguson cabins are renowned for excellence, and the MF TH Series is not immune of that legacy. It's something we work hard for, so you can sit and reap the benefits when days are long, in a very productive environment that blends comfort and quietness, with ease of use and quality. We know that a more productive operator will create more profit for his business.

The new, curved shape cab design, the new engine bonnet lower profile and the low boom pivot point ensures unsurpassed visibility all around the machine, especially from the rear of the cab whilst working in tight and narrow spaces. An unobstructed view of front attachments ensures safe and precise loading and unloading, making it easier and safer to position bales or pallets at elevated working heights.

Intuitive controls thanks to the Multifunction Joystick

The new multifunction joystick is close to hand, ensuring efficiency, quick and easy operation and total productivity. A digital display screen located on the dashboard shows valuable information such as maximum speed and flow of hydraulics, job hours, vehicle or engine speed, boom angle, speed management and auxiliary hydraulics.

The positioning of the joystick falls naturally to hand and incorporates all the main controls needed for operating the boom and attachments.

- 01 & 02 Dashboard display settings
- 03 Boom extended/retracted
- 04 3rd function
- 05 Boom suspension
- 06 Optional Forward, neutral,reverse selection

Standard feature Eco mode

The operator can activate a new eco mode by just the flick of a switch in the cabin. Oil flow and engine RPM are managed in order to reduce fuel consumption.

An Operator area to increase Comfort

The superior operator environment consists of a spacious cab interior with excellent all-round operator visibility and a reduced noise level. The cab layout is extremely ergonomic; controls and instruments are easy to use and have been designed to help make applications easier to manage.

Powerful and smart hydraulics

A powerful and consistent hydraulic system is paramount to the everyday productivity of a telehandler. There is a load-sensing spool valve management system on all models.

All functions are electro-hydraulic and proportional thanks to a load-sensing hydraulic system. It's very accurate and easy to use, plus it allows the operator to simultaneously use three functions, increasing productivity and reducing downtime.

There is optimum hydraulic flow across the entire range with 100 l/min on MF TH.6030 and MF TH.7035 models and a market-leading flow of 190 l/min on the MF TH.6534 and MF TH.7038.

The load-sensing pump that supplies 190 litres of oil per minute on the MF TH.6534 and TH.7038, offers outstanding capabilities and performance, even at low engine speeds. Therefore, you can work at significantly lower speeds, consume less fuel and can count on remarkably shorter working cycles. The load sensing pump only supplies oil when hydraulic power is required. This prevents unnecessary oil-heating and power loss. If required, the full oil volume is available immediately.

SMART HANDLING

High spec boom controls, thanks to 4 electro hydraulic load sensing spool valves, will allow the operator to simultaneously use 3 functions with high precision. The oil goes exactly where the operator wants it to go, it does not simply go where it's easy. Optional boom suspension also provides outstanding comfort for all transport applications. Cushion Retract is now fitted to the boom, ensuring a smoother action and prolonging the life of the components.

Standard feature SHS (smart handling system)

From the new display menu, the operator will be able to set max hydraulic flow available. By adjusting the max flow, the machine can be much smoother and more accurate.

Integrated, pressure-release quick couplers are conveniently mounted on the boom head for fast, efficient and easy coupling and uncoupling of implements.

Connecting and disconnecting is simple thanks to the connector block and its pressure release system. For more demanding implements such as straw choppers and feeding buckets an electric line can be specified, giving a fourth and fifth service.

A load sensing pump on the MF TH.6534 and MF TH.7038 models supplies a class-leading 190 litres of oil per minute.

Smart generation of cost effective power

Thoughtful engineering and design means that you receive the best features within the MF TH Series telehandler. Powerful, efficient engines, high-performance transmissions and precision hydraulics, guarantee a trustworthy ally for many of the jobs you need to get done quickly on the farm. The MF TH Series features a new 3.4l four-cylinder Tier 4 Final compliant Doosan engine which uses straightforward technology to give an environmentally friendly solution with no compromise. The engine delivers 100hp on the MF TH.6030 and MF TH.7035 and 130hp on the MF TH.6534 and MF TH.7038.

Each of these models has a powerful and efficient engine, providing plenty of torque in applications that demand more traction and force. The larger and improved design of the engine cooling system ensures continuously high performance in demanding and confined operations. The engine is now mounted lengthways, not only does this ensure space for the boom to sit without impeding visibility when in the cab, but access to the engine area for servicing and maintenance is easy and straightforward.

Automatic fan Inverter

A proven feature from the previous MF Telehandler generation is now available with an automatic option to keep the engine clean for maximum efficiency. It offers speed regulation depending on air temperature or working at a pre-set speed, with automatic mode selected via a button on the dashboard.

Standard feature ECO mode

The operator can activate a new ECO mode by just the flick of a switch in the cabin. Oil flow and engine RPM are managed in order to reduce fuel consumption.

A new engine installation and basket design has lowered the height of the engine for improved right hand side visibility. With a reinforced bonnet and bigger opening, MF TH models also benefit from a new bonnet opening handle system

ENGINE HIGHLIGHTS

- Maintenance-free, high performance engine.
- Powerful and efficient with ECO Mode
- Low operation costs courtesy of a DPF and EGR free engine design saves time and money
- The engine remains parallel to the boom, providing excellent access for inspection of the engine bay area and improved right-hand side visibility
- Straightforward technology for a more productive working day
- Optional automatic fan inverter for easy cooling package cleaning and optimum productivity

Smooth operation from the hydrostatic transmission

The two speed hydrostatic gearbox offers simplicity and smoothness of operation as well as high-performance output and capability. It has speed capabilities of up to 40 km/h* with two mechanical gears comprising of two speeds which allows the customer to choose the best speed for the application and gives excellent performance in road transport.

It also has an easy-to-set creeper function for operations that demand low speed at higher engine revs. This feature provides more accuracy and control for operation such as sweeping, silage distribution, and straw spreading.

TRANSMISSION HIGHLIGHTS

- Hydrostatic transmission allows very accurate and very smooth control and operation of the machine
- Unique 4 speed (2 mechanical x 2 hydraulic) allows the operator the most accurate control during material handling
- Choose the best ratios for ergonomic control of the machine
- Excellent road performance thanks to two mechanical gears

*Dependent on market-specific legislation

Side opening of the bonnet gives you wide, open access to the engine, air filter, cooling system and air conditioning system; providing quick serviceability to all the major points.

The air filter is removed easily for checking and cleaning. An optional automatic reverse fan is available if required. Just press the switch or set the automatic activation and the fan reverses its cycle, blowing out any dust, straw and other material that may become stuck to the cooling package.

From ground level, you can easily lift the hood to check the engine and radiator. All routine engine, hydraulic and transmission service points are easily located for fast and simple maintenance, keeping downtime to a minimum.

Servicing made easy

Less downtime - more work done

Fast, Straightforward and easy routine maintenance

Servicing is straightforward and simple thanks to well positioned service points, taking the stress out of maintaining your telehandler and leaving you with more time in the field/at work.

Easy to fill diesel and AdBlue® tanks from ground level.

Lifetime from Massey Ferguson

Anyone who sets standards with a telehandler can't stop doing so when it comes to servicing

The Massey Ferguson Distributor and Dealer network ensures every machine comes with the support and service you need to keep working – whenever and wherever you need it.

Massey Ferguson is always by your side when you need it to keep working overtime. We have one of Europe's most extensive service networks for farming machinery. But we offer much more besides: our machines services packages as well as our individual financing solutions can help your business to operate competitively and cost-effectively – both with regard to purchase of your MF TH Series Telehandler and throughout its entire useful life.

You can experience our comprehensive range of services at your local Massey Ferguson Dealership to help increase your MF TH Series Telehandler availability and lower overall costs. Your Massey Ferguson sales and service advisor will be pleased to provide you with detailed advice on what best suits your needs.

manager* provides total peace of mind

manager Service and Extended Warranty Plan* is a comprehensive, industry-leading package that provides total care of your tractor providing routine maintenance, repairs and a full AGCO-backed warranty, which includes:

- Engine and transmission
- Electronics
- Hydraulics
- Cab and controls
- PTO
- Axles
- Steering

Regular servicing in the **manager** plan provides 'preventive maintenance' – picking up any faults before they become a problem, which helps reduce downtime. A full dealer service history, using genuine AGCO Parts will also increase the residual value of the machine.

AGCO Finance* provides the perfect financing arrangement for your business

AGCO Finance is the integrated financial services arm of Massey Ferguson offering tailor made solution to your own farm, which includes :

- Leasing
- loan facilities
- Hire purchase
- Full service packages
- Contract hire

* Please contact your Massey Ferguson local dealer to check availability in your area. Terms and conditions apply that might vary according to the market or country.

Industry-leading parts supply from AGCO Parts.

Find the perfect attachment for your MF TH Series Telehandler and all your needs

We offer the perfect range of attachments to go with the MF TH Telehandler Series (purposely engineered and built of the MF TH Series) to be able to cope with all type of applications: lifting light or heavy loads, move silage, feeding livestock, etc...

Bucket, Digging and Loading

Tackle the toughest digging and material handling tasks with our robust digging and loading buckets. They offer good visibility of the cutting edge, excellent breakout force for digging and easier and faster bucket filling. Available in a range of capacities, with or without teeth.

Bucket, Large Capacity

Boosts productivity thanks to its increased roll-back angle to minimize spillage. Use it to feed grain to livestock or to distribute fertilizer.

Bucket with Grapple

The ideal attachment to pick up and handle dirt and soil with overgrowth, branches or other bulky materials that need to be firmly grasped during transport.

Fork with Grapple

This is the easy way to handle loose hay, bedding and manure on the farm and other sites. Use the utility fork by itself or add the hydraulic grapple for more gripping power.

Pallet Forks

Great for handling bulky or bagged materials such as fertilizer, seed and animal feed. Especially handy when you're working in tight areas. Choice of rigid or floating forks available (with sideshift on the rigid fork frame).

Bale Fork

Use is to efficiently transport and load round bales from the ground onto a trailer or into a bale feeder.

Bale Squeeze Handler with Tubes

All the performance of our tined bale handler but with two hydraulic arms in the form of round tubes to ensure a secure hold on single bales.

Bale Squeeze Handler with Tines

Transport and load up to two round bales from the ground to a trailer or bale feeder. The independent hydraulic arms, each equipped with 4 tines, provide a firm grip.
