PROSPECTOR PRO® TRACK SYSTEM

Polaris®-specific gearing provides 1:1 ratio to:

- Minimize track slip, providing better climbing ability and improved traction in deep snow
- Improves top speed over prior models by approximately 5%
- Reduce operating RPM for a quieter ride
- Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear

New front dual stabilizer for improved stability

Polaris® Exclusive optimized hub geometry that minimizes feedback and eases steering effort

Flexible lug design for the highest level of deep snow performance by lifting up in deep snow as opposed to digging down

Lightweight design with slight weight reduction over Camoplast kit provides for better flotation, eases steering effort and provides better vehicle control
